GOOD AUTO CAMP IS REAL ASSET IN ALL TOWNS

At a time when progress is being made in completing this season an all-weather highway to Jasper National Park, while other parks are linked with road connections of a similar standard, visitors are going to be interested more than ever in the auto camp facilities available in this province.

One of the first questions is in relation to the auto camps. People want to know where they are located and what they have to offer.

Officials of the Alberta Motor Association are urging that municipal authorities, business men's associations or others give immediate attention to auto camp accommodation. Towns which do not have such camps would do well to see that they are established without delay, if only on a limited scale this season.

Other camps which have been in operation might well stand some overhauling and improvements.

The leadership given by Edmonton, Calgary, and other urban centres might well be heeded at this time. There the camps have been well located and operated while their popularity has made it necessary to extend the facilities this year. New cabins have been built, and even with these, there are not sufficient at times to take care of the demands.

Municipal authorities are being impressed with the need of commencing without delay to build up an attractive auto camp. It is an investment in a cash business that will reap good returns, while it is possible that there is no finer type of advantageous advertising than that which gives generous praise to a local auto camp. It sends people away delighted, and the delighted ones invariably return.

The remains of Mrs. Ethel M. Gale were laid to rest in the local union cemetery on Friday afternoon, the funeral being largely attended. She is survived by her husband, employed at the Sentinel station of the East Kootenay Power Co.; two sons, Albert of Blairmore, and Thomas, of Chisholm, Alberta; and two daughters, Mabel living at home (Sentinel), and Mrs. Frank Nunn, of Lacombe.

YOUTH TO SPEAK AT CENTRAL UNITED

Mr. Richard Morton, from the Frank West Camp, will be the guest speaker at the morning service at 11 o'clock next Sunday, August 11th. His subject will be "Youth and the Building of Highways." Mr. Morton is a young man, around twenty years of age and he will have a live message for those who come to hear him. The young people are especially invited to hear this young man. He is a graduate of the 1935 class of the Calgary Normal School and a member of Pleasant Heights United church, Calgary. The minister will be in charge of the service.

An army of 14,500 additional government employees would be required and \$16,500,000 in extra administrative costs would be created if the Aberhart system of Social Credit were put into effect in this province, Hon. J. F. Lymburn, attorney-general, charged in a recent speech.

The Enterprise has been approached on several occasions during the past two weeks as to its stand to be taken in the forthcoming provincial or federal elections. The answer has been the same to all enquirers: The Enterprise is not taking sides for any party, but is willing to allow any of the candidates from three to four hundred words per week to express their opinions through our columns. Also we have advertising space to sell.

BATCH-SMITH

The home of Mr. and Mrs. Arthur J. Smith, 210 Fifteenth avenue east, Calgary, was the scene of one of the prettiest weddings of the season, when on Thursday afternoon last at 5 o'clock, their daughter, Alice Mary, became the bride of Mr. Jerry Edward Batch, son of Mr. and Mrs. Jacob Batch, of Sundre, Alberta. In the drawing room, under an arch of bridal bells, the marriage ceremony was performed by Rev. Dr. R. H. MacKinnon. The bride, who presented a pleasing picture in a white silk tulle dress with orange blossom bridal wreath, was given in marriage by her father.

The matron of honor was the bride's sister, Mrs. K. Good, who wore a pale blue tulle dress and carried a carnation bouquet. Mr. J. A. Batch, brother of the groom, acted as groomsmen. After the ceremony twenty-five guests sat down to a wedding breakfast at a table centred with a three-tier wedding cake in the dining room which was decorated with white wedding bells. The toast to the bride was proposed by Dr. MacKinnon and responded to by the groom. The bride was the recipient of many gifts.

After a short honeymoon Mr. and Mrs. Batch will make their home in Lethbridge.—Calgary Albertan.

During the severe electrical storms in British Columbia recently, no less than thirty-three forest fires were started.

HILLCREST CARNIVAL

THIS WEEK END

Don't miss this big annual carnival to be held at Hillcrest, Saturday and Monday, under the auspices of the Hillcrest Miners' Literary and Athletic Association. All feature attractions of a carnival will be in operation.

The proceeds of the carnival go towards the fund of the picnic to be held on Sunday.

The man who gets the idea he is a big shot is often the first to be fired.

A CANADIAN LEGION

TRIBUTE TO SCOUTING

They, as a body, work the Legion can undertake than helping along the Scout Movement. It teaches boys the amenities of life, how to be useful and self-reliant, and to direct their energies in safe and sane channels.—President R. A. Patchell, Carleton Place Branch, Canadian Legion, in advocating the sponsoring of a Scout Group.

Another thing this country needs is a good five-cent chain letter.

THE REMAINS OF MRS. ETHEL M. GALE

The remains of Mrs. Ethel M. Gale were laid to rest in the local union cemetery on Friday afternoon, the funeral being largely attended. She is survived by her husband, employed at the Sentinel station of the East Kootenay Power Co.; two sons, Albert of Blairmore, and Thomas, of Chisholm, Alberta; and two daughters, Mabel living at home (Sentinel), and Mrs. Frank Nunn, of Lacombe.

Geo. E. Cruickshank

INDEPENDENT CANDIDATE
Rocky Mountain Constituency

I respectfully solicit your vote and influence. If elected, I shall continue, as in the past five years, to work for:

A greater measure of consideration of the injured workmen by the Compensation Board.

A more equitable distribution of compensation by the Board.

The completion and hard-surfacing of the Calgary-Banff highway, and oiling of the other main highways, thus eliminating the dust menace and encouraging an increase of tourist traffic.

The application of the provisions of the Health Insurance Act to all parts of the Province where necessary as quickly as possible.

A programme of "Work and Wages" for the unemployed, both in and out of the Government camps.

The extension of the market for Alberta Coal to all points in Eastern Canada as far as Toronto.

Donald J. MacNeil

LIBERAL CANDIDATE
ROCKY MOUNTAIN CONSTITUENCY

Alberta Provincial Elections, 1935

I very respectfully solicit your vote in the approaching election.

I shall give my wholehearted support to Mr. W. R. Howson, Leader of the Liberal party in Alberta, in carrying out his policies, and particularly, when elected, I shall unceasingly work for:

1. The extension of our markets for Alberta coal.
2. Improvement in both the living and working conditions of the miner.
3. The welfare of our young people in matters of education and vocational training.
4. A fairer and more equitable application of the provisions of The Workmen's Compensation Act.
5. The encouragement of tourist traffic to our parks and incomparable mountain scenery by the further improvement of our main highways.
6. Better market roads for our farmers throughout the Province.

DONALD J. MacNEIL,
Liberal Candidate, Rocky Mountain Constituency.

PUBLIC MEETING

In the Interests of Mr. MacNeil, will be held in the
COLUMBUS HALL
8.30 p.m.

Fri., Aug. 9th

to be addressed by

MR. A. MacLEOD SINCLAIR, K.C., of Calgary, MR. MacNEIL and others.
EVERYBODY WELCOME

ITALO-ABYSSINIA WAR MAY YET BE AVERTED

Geneva.—Italo-Ethiopian peace struggled in stormy waters of formulas, methods of approach, proposals and counter-proposals, deadlocks and rays of optimism, but an agreement appeared to be in sight.

The British, French and Italian delegates agreed upon possible ways to keep peace in East Africa. Only Benito Mussolini's final approval of the draft plan was needed.

The tentative program was worked out at two conferences Baron Pompeo Aloisi of Italy, Anthony Eden of Great Britain and Premier Laval of France held.

Laval explained the tentative peace formula to Ethiopia's representatives. It was understood they had no real objections to it.

The dispute itself, for the time being, is set aside. Yet the difficulties over procedure are minor compared with the difficulties which lie ahead of a peaceful settlement of the dispute.

Both Italy and Ethiopia are moving up their troops. The wet season is nearing its end.

Addis Ababa.—Ethiopian fighting men, convinced war with Italy was almost at hand, besieged hastily created recruiting stations after Emperor Haile Selassie and his tribal chiefs ended their secret two-day council.

Denied the right to bear arms, women met in the Palace hall, formed "The Association for the Defence of the Country," started raising funds and subscribed \$50,000 within an hour.

To Help Veterans

Organization To Seek Work Will Be Set Up

London, Ont.—A national organization, serving voluntarily, and backed by a group of veterans' organizations, will be set up in the near future to deal with unemployment among veterans, declared Brig.-General Rose, Dominion president of the Canadian Legion, at the annual banquet of the provincial command of the legion at the close of the first day of the three-day convention here.

"Set-up for giving assistance to unemployed veterans is embodied in the Hyndman report dealing with what is considered one of the most difficult problems confronting the Canadian Legion, he said. Gen. Rose explained that the commission to be formed would consist of three men serving voluntarily, who would build up a national organization with boards in all towns and districts which would find work for veterans.

Cheer King And Queen

Canadian Teachers In London Pay Visit To Palace Grounds

The serene atmosphere of the grounds of Buckingham Palace was shattered by three ringing cheers for the King and Queen from a party of 220 Canadian school teachers and school children, visiting England under auspices of the Overseas Education League.

The party was in the grounds when the royal car approached from an inner quadrangle, carrying Their Majesties to Victoria station en route to the Cowes regatta. The King stopped the car and with the Queen chatted with Major and Mrs. F. Ney, in charge of the party, and some of the visitors.

Bear Low Interest Rate

All Records Broken When Recent Loan Was Flashed

Ottawa.—Breaking all records for low interest rates, a \$30,000,000 issue of Dominion Canada treasury bills has just been sold, it was announced. At the price received the average yield per annum on the bills is 1.287 per cent. The previous low mark was an issue of \$20,000,000 sold to yield 1.38 per cent. per annum.

The bills are due November 1 and the discount price of the accepted bids was 99.69. Proceeds will be used to retire in part an issue of \$50,000,000 in bills taken up by the chartered banks some months ago at a yield of 2 1/2 per cent. per annum.

Royalty Taking Holiday

Portsmouth.—King George and Queen Mary, accompanied by the Duke and Duchess of York, boarded the royal yacht, Victoria and Albert and sailed for a two weeks' cruise which will include attendance at the annual Cowes regatta.

Flood Damage Heavy

No Transportation Into Slave Lake Area Except By Air

Slave Lake, Alta.—Rampaging Lesser Slave Lake, which for two and one half days has pounded five-foot waves into this flood-stricken town, had left a scene of desolation with residents living in tents on higher ground, small buildings washed away, and others undermined, until they threaten to crumble.

Lashed by an inshore gale, the waves battered away small buildings, including the post office, and residents are fearful that a new wind will complete nature's onslaught. The lake is already at high level and even in calm weather travel through the town is done by boat. Damage in the flood of the last few days is estimated at \$250,000.

Valuable farm lands on the shores of the lake have been inundated and the valuable top-soil carried away by the waves.

There is no transportation into this area except by air. The highway is still under water for nearly 50 miles, and the Northern Alberta Railway, which put through trains last week after 10 days tieup, again is blocked as a result of new undermining of rails by the waves. The former trouble sections on which repair work was done are holding up, however.

Chinese Eat Unripe Grain

Endeavor To Stave Off Starvation Until Help Arrives

Chungking, Hupeh.—Flood survivors, swarming like locusts on the uplands behind this stricken city, devouring unripe grain to save themselves from starvation.

Relief from Hankow was 300 miles away and coming slowly. The emaciated, ragged survivors sometimes, in bands 1,000 strong, worked away grudgingly from Chungking where the dead seem to lie everywhere, the bodies of men, women and children mingled with those of animals.

The Han river, which brought unprecedented disaster to valley dwellers when it rose 20 feet in a few hours during the night of July 7, was still flooding the territory.

Deprived of food or hope of food, until relief arrives, the starving hordes in the uplands stopped to eat whatever they could find. They did not plunder or steal. They resorted to inhabitants of villages they entered:

"We come to eat."

To Guard British Legation

Silks From India May Be Sent Into Ethiopia

London.—Preparations are being made to send detachments of Silks from India to Ethiopia if reports from the British legation in Addis Ababa indicate they will be necessary to protect the legation building, it was learned here. Britain is also ready to supply 200,000 m. silks and their families now in Ethiopia. All the missionaries have been instructed to keep in close touch with the British legation.

It was revealed in the House of Commons no embargo has been placed on the export of the silks of raw materials which could be used for the manufacture of munitions. Great Britain has granted Italy 35 permits to send planes over British territory in East Africa, the house was told. Twenty of these were for British Somaliland, and the others for the Sudan.

Designs New Coin

Washington.—Borrowing his motif from the dough-nut, President Roosevelt has designed a coin which soon may be jingling in American pockets. It is a half-cent piece, and treasury secretary Henry Morgenthau said it had a hole in the centre. The president also sketched a one mill coin, which unlike all other United States metal money, is square.

Leads In Wheat Exports

Ottawa.—Canada was first in exports of wheat to the United Kingdom market during the first six months of 1935, according to a statement issued by the Dominion bureau of statistics. The Dominion was also first in oats, wheat flour, lobsters, copper ore, copper rods, crude zinc, non-ferrous metals, patent leather, and rubber manufacture.

Counterfeit Coppers

Vancouver.—Counterfeit one cent pieces are the latest in bogus money to appear in this city. The coins are expert imitations and have only one defect. They are made from copper but one-half the thickness of the government issue.

Garnet Wheat Price Set

Separate Grading Went Into Effect On August First

Winnipeg.—The approximate market value of Garnet wheat as a separately-graded wheat was established July 31 by the cash closing committee of the Winnipeg Grain Exchange.

No. 1 Garnet was quoted at 79¢ cent, three-cent a bushel under No. 2 Northern, and No. 2 Garnet at 77¢ cent, the same price as No. 3 Northern.

Previously, Garnet wheat has been graded with No. 2 Northern, but starting with the new crop year Aug. 1, it will be kept separate from the Northern wheat and graded separately into two grades. Any Garnet unit for the two specified grades will automatically grade No. 3 Northern or lower.

SURVEY SHOWS RUST WILL HAVE SERIOUS EFFECT

Ottawa.—Rust had seriously reduced the yield of all bread wheats in Manitoba and the infection was spreading westward into Saskatchewan, stated a crop report released by the Dominion bureau of statistics. The drought area in Saskatchewan was also extending.

In the west, the report said, "July has again provided conditions that were fatal to the good crop prospects on the southern plains where the conditions in May and June were so promising." In addition to the rust the drought area, which had been limited to rather narrow belts along the Alberta-Saskatchewan boundary, was extending eastward. Harvesting of the main wheat crop would not be general in that area for two or three weeks "so the prospect is very indefinite and unsatisfactory."

"Rust has so severely infected the 1,500,000 acres of bread wheat in Manitoba that only a very light yield of poor quality grain can be expected. The infection on the remaining 1,000,000 acres of Durum wheat remains slight. Coarse grains are also rusted."

"Rust and drought are causing serious reductions in Saskatchewan crop prospects and the weather of the next two or three weeks will have a very important bearing on the ultimate yield. In large areas running through the centre of the province from north to south, crop conditions remain very promising. In some central areas will harvest light crops, but good prospects persist over the remainder of the province."

Winnipeg.—Stem rust infection has extended in Manitoba and Saskatchewan, according to the third rust report by Dr. J. H. Craigie, officer in charge of the Dominion plant research laboratory.

In Manitoba, stem rust has affected wheat as far north as Riding Mountain National Park and in some cases has attained "severe epidemic proportions" in common wheats, the report said.

The western limit of infection in Saskatchewan seemed to be slightly west of the city. The infection of a north-south line drawn from Saskatoon to Moose Jaw, with severe infestation in the southeastern section. Some traces were found north of Prince Albert. No stem rust has been reported from Alberta.

NEW SENATOR

Veteran parliamentarian Colonel Thomas Canney, who has been a member of the House of Commons for many years, was one of the new appointments to the Canadian Senate.

Start Aerial Survey

Dr. Charles Cannell Leads Party In Northern Trip

Prince Rupert, B.C.—A 10,000-mile aerial survey of northern Canada began July 30 when a party led by Dr. Charles Cannell, deputy minister of mines for Canada, hopped off at 2 p.m. for Wrangell, Alaska, in a seaplane piloted by C. H. "Punch" Dickens.

A. D. McLean, superintendent of Canadian Airways and W. H. Subgrland, photographer, are other members of the party.

Dr. Cannell plans to take aerial photographs of 30,000 square miles of unmapped territory in the south-eastern Yukon, north of the Liard river. Geographers believe the Rocky Mountains come to an end in that vicinity and the Mackenzie ranges which lie to the east, may be a separate mountain system.

The "tropical" valleys of Indian legend lie in the region to be explored. If possible, the party will land and investigate these valleys.

The survey will be concluded about August 15 at Edmonton.

South Africa Prosperous

Unusually Rich Almost Doubles Proportions State Trade Commissioner

Vancouver.—South Africans are enjoying a period of prosperity almost reaching the proportions of a boom while most of the world is suffering from depression, David de Meyer, South African trade commissioner to Canada, said in addressing a service club.

He said millions of dollars of new wealth was created when the country went off the gold standard and in 1934 South Africa increased her purchases from Canada from \$5,700,000 to more than \$12,000,000 and became the second largest purchaser of goods from Great Britain.

Report Better Conditions

Kansas City.—Rural middle America is going off relief. By thousands, farm families are becoming self-supporting, aided by better crop conditions, resettlement loans and their own efforts, an Association Press survey showed. Eight states report a relief list at present of less than 50,000 families.

DUCHESS OF YORK GOES ON HER FIRST AEROPLANE RIDE

This picture was taken when the Duke and Duchess of York travelled by aeroplane from London to Brussels, Belgium, to view the International Exhibition there. Above is a picture of the charming lady, left, looking none the worse for the trip, which was her first flight.

Ready To Retaliate

Scottish Co-Operative Secretary Warns Against Wheat Board Hindering Trade

Calgary.—If the new Canadian wheat board places any impediment in the way of trade, the Scottish Co-operative Wholesale Society of Glasgow will retaliate by diverting its wheat purchases into other channels, J. McCormick, member of the society's party touring Canada, said here.

Mr. McCormick, making a survey of Canadian political and economic problems with regard to their effect upon Scottish-Canadian trade, stated the society imported 3,000,000 bushels of Canadian wheat a year. He added the society owns the largest flour mills in Scotland and made the best and cheapest bread in that country using 90 per cent. Canadian hard wheat.

He was not impressed with the Ottawa agreements, Mr. McCormick continued, and Scottish trade had benefited little from them. Free trade was the only proper method of dealing with international exchange of goods.

Chief accountant of the society, he is accompanied by Cameron Thompson and C. Hewitt, directors.

Russian Sub Sinks

Collided With Surface Vessel And 55 Men Drown

Moscow.—A brief official announcement, laconic as are most such Soviet revelations, disclosed the death of 55 Russian seamen, some of them young cadets, in the sinking of the submarine B-3 in Finland Bay one week ago.

The submarine, participating in the current Baltic fleet manoeuvres, came up from an underwater cruise and collided with an unidentified surface vessel.

A gaping hole was torn in her hull and she sank immediately. All aboard were officers, seamen and naval school students—perished.

The submarine was of the old "bars" type built in 1917, toward the end of Russia's participation in the Great War. A mass funeral will take place at Kronstadt.

The government will distribute sums of 10,000 rubles to families of the victims. Pensions also will be paid, it was announced.

RELIEF SYSTEM IN ONTARIO IS TO BE CHANGED

Toronto.—Drastic reorganization of Ontario's system of unemployment relief to curtail costs and to return responsibility for relief administration to the municipalities was announced by Premier Mitchell F. Hepburn following a session of the Ontario cabinet.

"These steps are absolutely necessary to maintain the solvency of the government," the premier declared as he revealed his government had established a new basis for the province's contribution to relief costs. Instead of paying a proportion of total relief costs the government will make specified lump sum payments on a per capita basis.

From September 1, in all of the 17 bankrupt municipalities where the government has assumed the full burden of relief, the province's contribution will be payment of a maximum of \$7.50 monthly per capita. The per capita costs in these municipalities under the present system has ranged from \$3.50 to \$13.50 per month.

In all other municipalities exclusive of the unorganized districts of northern Ontario the government's maximum contribution will be \$5 per capita after Sept. 1.

Municipalities will be required to assume full responsibility for relief administration.

This reversal of the policy of Hon. David Croll will be accompanied, the premier said, by a drastic shakeup within the welfare department. "Our objective is to reduce the welfare department to a mere shell," the premier said.

"The per capita cost of relief is lower in many of the municipalities which handle their own relief. Our system has been too expensive," he said.

Under the present system the premier estimated that relief would cost the province about \$36,000,000 a year. By the new plan it is expected that a saving of more than \$10,000,000 can be effected. There would be an immediate saving of about \$240,000 annually in administrative costs alone, the premier explained.

AIR ROUTE ACROSS NORTH POLE IS SOVIET PLAN

Moscow.—Air travellers between North America and Russia may fly squarely over the North Pole two or three years hence, Soviet officials predicted, if success crowned Sigismund Levanevsky's proposed non-stop Moscow-to-San Francisco flight.

The trail Levanevsky's single-motor, radio-equipped ship will blaze through the polar regions may be the commercial route of the future, Otto Schmidt, head of the northern sea route department, declared.

Levanevsky, the Soviet's most famed flyer, was confident he and his two companions could cross safely the polar barrens and down over northwest Canada to California, 6,000 miles away.

"We expect to reach San Francisco in three days and nights at the most," he said.

A permanent meteorological station located at the pole itself in another Soviet project, Schmidt disclosed, this to be supplemented by stations on the ice at either side of the pole.

Schmidt said the Russians already had established 40 radio stations above the Arctic circle on islands and the coast which send regular weather reports to central stations at Cape Schmidt, Dixon Island and the cutter Sadko.

Japan's Aerial Defence

Taxation For Commercial Program Is Heavy

Tokio.—Japan is going ahead with a big plan for the encouragement of civil aviation aided by aids with the completion of her five-year plan of aerial defence.

Initial expenditure on the plan for civil aviation will total the equivalent of \$60,000,000, and thereafter the Ministry of Communications will spend about \$10,000,000 a year in promoting aviation.

An elaborate program to link Japanese domestic air lines with the world's airways has already been worked out.

Most of the money spent on the five-year air defence program will be spent in building new airbases, purchasing new equipment and strengthening air defence generally.

Bill Passes Through House

Will Give India Modified Self-Government When Made Law

London.—The government's India bill has completed its long passage through parliament.

The House of Commons agreed to more than 300 amendments made by the House of Lords and the bill, providing India with modified self-government, was ready to be enacted into law.

It provides for a federation of Indian native and British united states, each with its own autonomous legislature.

The Indian government itself will have more independence than any other previous government at Delhi. The bill, however, maintains certain safeguards, with Britain controlling foreign policy and defence.

Explosion Traps Miners

Heroic Efforts Fail To Rescue Men In Transvaal

Ermelo, Transvaal.—All hope has been abandoned for the rescue of 78 native miners trapped in a gallery following an explosion which killed two white miners on the 300-foot level of the Marsfield mine at Estantia, 150 miles from Johannesburg. Heroic efforts of rescue squads which reached the mine shortly after the explosion were without avail.

Citizens See Falling Star

Toronto.—A huge falling star which thrilled Toronto citizens was described as shooting like a rocket out of the northwest, leaving a streak of yellow light which remained in the heavens for about 10 minutes. Officials at the Dunlop observatory thought the star might have been a meteor and, as if brilliant as reported, might have fallen to the earth.

Qualifies As Pilot

Edmonton.—Believed to be the first woman to qualify as a commercial pilot in Alberta or Saskatchewan, Miss Margaret Fane, 21, has successfully passed her flying tests here. It was announced by Howard C. Inge, inspector of civil aviation for western Canada.

AIRPLANE EXPERIMENTS

It is possible before long that as a result of experiments in Great Britain a 10,000-mile non-stop flight by airplane will be made. In other words, the journey would be made from Great Britain to Australia in one jump. The experimental work is on low-consumption aero-engines, and remarkable results have been obtained. If it proves successful there will be a drastic change in the whole conception of the range limitations of airplanes. The approaches to this problem are the use of compression ignition engines running on heavy oil, the use of sleeve valve engines and the employment of specialized systems of automatic mixture control.

It is now claimed that "the new British air-cooled sleeve valve engines have not only shown a lower petrol consumption per brake horsepower hour than any comparable air-cooled types, but they have also shown a lower oil consumption." Moreover, the compression ignition engines have been giving exceptionally low consumption figures, even for this normally very economical type. The automatic mixture control relieves the pilot of the duty of adjusting the carburetor mixture. The tests are designed to find the best fuel-air mixture which is of vital importance to secure great range. The manual mixture control hitherto used for long-range attempts has proved satisfactory. The automatic control is a great step forward. It will not be long now before Great Britain makes an attempt to prove the feasibility of the present experiments. In the new machine to be designed it is the engine work that will be the main part of the problem. The result may well prove that a new long distance record, and perhaps by a wide margin will be made.

The Lethbridge Herald asks: Will the merchants of Alberta be willing to receive non-negotiable certificates in lieu of hard cash for the relief slips issued by cities?

The contract for the interior decoration of Firgrove school has been awarded to the Britannia Paint Works. G. K. and staff left on Tuesday morning to look after the work. After two unsuccessful attempts of would-be painters, the exterior of the Blairmore Orpheum theatre has been repainted in a first-class manner by the staff of the Britannia Paint Works, the firm you can always rely on to deliver the goods. Quality last long after price is forgotten.

All congregations are made up of various political stripes and the minister is certainly lacking in wisdom, who takes a part in election campaigns unless it is in support of moral principles. While generally speaking the clergymen have as much right as any other citizen of the Dominion to their own opinions; yet, it must be remembered they are set apart to preach pure and undefiled religion, and politics and religion do not mix. Perhaps there is nothing can get a minister in wrong quicker than taking sides in any controversial matter other than one of good against evil. We imagine that the head of the great United Church of Canada, to avoid certain disintegration of that denomination, will have to crack the whip and keep his followers on their job preaching the gospel and leave the fiscal policies of the country to the educated and experienced men in affairs of state—Financial Post.

AN INTERESTING SURVEY

Following the checking and cross-checking of voters in all constituencies in Alberta, the following interesting summary of results has been obtained and published in a recent issue of the Edmonton Bulletin:

Percentage allowances were used to cover the total vote in each riding to give a forecast of the probable results. Allowances were calculated for proportional representation in the cities of Calgary and Edmonton, which are multiple constituencies electing six members each.

The most surprising information obtained is that the Conservatives would not elect a single candidate, if it was not for the Alberta system of proportional voting in Edmonton and Calgary and the transferable vote in the other fifty-one constituencies.

The Aberhart Social Credit party shows a puzzling situation. In some polls they have a strong following, while, in adjoining polls in the same constituency their support is nil.

In many constituencies friction has been noticeable among Mr. Aberhart's followers. The impression held is he made a tactical error when he took upon himself the rather undemocratic method of saying who was and who was not to be a candidate.

In the opinion of many, the publication of his "Manual" was a fatal mistake, because the more it is studied, the more its glaring inconsistencies are made apparent. The Aberhart "State Credit House" plan is clearly unconstitutional and, furthermore, it is rapidly being realized that the whole proposal is a gigantic taxation scheme, involving the huge amount of \$120,000,000 annually.

The U.F.A. party finds itself in anything but a happy position, according to the survey. Without exception, dissatisfaction is found in every constituency among members of this party, largely because of the lack of leadership and action on the part of the government, and also because recommendations made to the premier and his colleagues by the various U.F.A. conventions in the past few years have been almost entirely ignored.

The personal troubles of the former U.F.A. premier and his minister of public works are also proving too heavy a burden for some U.F.A. candidates to shoulder, as they feel that the records of these two party leaders are indefensible.

The Labor and Independent candidates are receiving very little support in any section of the province and appear to be in much the same position as that of the Conservative candidates.

The Liberal party candidates in the majority of the ridings, are overwhelmingly supported and indications are that, in many constituencies, the opposing candidates will lose their deposits.

The standing of the different parties, based on the above calculations, is as follows:

Liberal	41
Aberhart Social Credit	9
U. F. A.	7
Conservative	3
Labor	2
Independent	1

Total

In the canvass made, it is also indicated that unusual interest is being taken by all electors, but particularly by young people, many of whom are voting for the first time.

To a man, kisses are like after-dinner speeches—always most interesting when they are impromptu, just long enough, and not too serious.

A rather stout woman was making herself a nuisance in the big shop which was holding its annual sale. Nothing, it seemed, would suit her, and the unfortunate shop assistant was beginning to get a little weary. "Haven't you anything ready-made that will fit me?" asked the customer at last. "Yes, the umbrellas and handkerchiefs are downstairs, madam," the girl replied.

BLAIRMORE UNITED CHURCH
Rev. Albert E. Larkie, Minister

"Serve the Church that the Church May Serve You."

Services Sunday, August 11th, the minister in charge.

10 a.m.—JUNIOR SCHOOL.

11 a.m.—PUBLIC WORSHIP.

ST. LUKE'S CHURCH NOTES

Rev. A. S. Partington, R.A., Rector

Sunday school and services will be discontinued until September 1st, when there will be celebration of Holy Communion.

THE SALVATION ARMY

Coleman, Alberta
Lieutenants Fitch and Pierce

Having great times at the Salvation Army in Coleman. Attendances at meetings are on the increase. You are heartily invited to attend.

Friday at 7 p.m.—Special meeting for Young People. Subject: "The Broken Arrow."

Sunday at 3 p.m.—Sunday School. Sunday Night at 7.—Great gospel service. Special singing and music. Everybody welcome.

Lieut. Pierce, who has been away on a few days furlough to Waterton Lakes, will be back with us on Sunday night.

Coming to Coleman and district: Major Acton, pioneer worker of the Salvation Army in the Pass. Watch for further announcement.

NEW ENGINE MYSTERIOUS

London.—A new Monarch of the Permanent Way has arrived.

"It" puffed—or rather hummed—into Euston station the other day to introduce itself to London and to show its paces to an admiring crowd, including Sir Josiah Stamp, the chairman of the London Midland and Scottish Railway.

"Turbotractive" is an engine numbered 6202 on the strength of the L.M.S. Company, but no one knows yet what it can do.

The "Turbotractive" is turbine driven, and is an experiment. It is nearly seventy-five feet long, and has an extreme height of thirteen feet three inches, with a width of nine feet. In the six-wheeled tender there are nine tons of coal, and in its tank 4,000 gallons of water.

But the mystery of Turbotractive No. 6202 is its speed. It has six gears. On a run from Crewe to Euston, only the first gear was used, and it reached a speed of sixty-five miles an hour.

What will happen when Driver Mardell pushes over the lever to the second gear nobody knows. And yet there are still four more speed gears.

The "Turbotractive" is the first turbine-driven locomotive to be built by a British railway company. It is to be employed experimentally on the haulage of 500-ton express goods the main line between London and Glasgow.

It develops 2,600 h.p., using superheated steam at a pressure of 250 pounds a square inch, and at a temperature of 750 degrees Fahrenheit.

Outwardly there is nothing to show that the locomotive has works, the only visible parts being the rods coupling the six driving wheels, each of which is six feet six inches in diameter.

Two American tourist cars, coming into town from the west on Sunday morning, turned down Fifth Avenue, travelled east along State Street to Eleventh or Twelfth Avenue, then rejoining the highway eastward. They had evidently heard of the condition of our main street.

CORRESPONDENCE

Blairmore, Alberta,
August 2nd, 1935.

Editor, Blairmore Enterprise,
Blairmore, Alberta.

Dear Sir—I have as Liberal candidate in Rocky Mountain constituency received the following letter:

Blairmore, Alta.,
Aug. 1st, 1935.

"To Mr. McNeill (Liberal Candidate for Alberta Provincial Elections).

Dear Sir—We the members of the Women's Auxiliary of the Mine Workers' Union of Canada and working class mothers, have the following questions to ask:

1. What is your stand towards Imperialistic War?

2. What will you do in Parliament if elected in case war broke out?

We are very interested to know because in 1914 we women sent our sons and husbands to fight for democracy, and now we know that all countries are preparing for another war and wants us to do the same thing again. We intend to fight against this and we think that any Candidate who may be elected should do so also.

Yours sincerely,

F. Castellan, Sec. W.A.
M. Kils, Pres. W.A."

My answer to the first question is, (1) I shall at all times, whether in public or private life, stand against war of any kind, unless it be in the defence of my country's liberties. I shall at no time (unless I am drafted) stand for or take part in any war of aggression against another nation with which we should be at peace.

My answer to the second question is, (2) If your confidence and votes return me to the Legislature of Alberta as your representative, I shall in case war breaks out while I am a member of that body, do what I can, first to safeguard the interests of Canada and its people against aggression, and secondly to bring the war to an early conclusion.

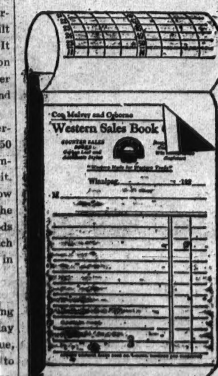

I am in full agreement with the last paragraph of the letter. I fully realize that the wives and mothers of Canada made immeasurable sacrifices throughout the Great War, and, so far as I can prevent a repetition of such sacrifices I can be depended upon to do so.

As I have not been given the name of any particular lady to whom I should address my reply to this thoughtful and kind letter, I trust that the ladies who have been so kind as to write me will accept this as a suitable acknowledgment of its receipt.

Yours truly,

DONLAD J. MacNEIL,
Liberal Candidate.

The following notice appeared in the Canadian Congress Journal recently: If the person who stole the jar of alcohol out of my cellar will keep the jar and alcohol, but return grandma's appendix, no questions will be asked.

Mr. and Mrs. T. O. Davies and family motored to Vancouver over the week end.

THE AGE OF NERVES

In the earlier days of medical science the malady of "just nerves" was one to be dismissed as of no importance. Now the disease is known as neuritis and is recognized in the medical category and treated with respect. It is as necessary as in organic trouble that the symptoms should be diagnosed at an early stage, the more so because neuritis is becoming a common disease when the human frame and mind are called upon to meet the complications of an age in which efficiency, speed and progress that "things are in the saddle and are battle cries." Someone has said "rule mankind." That is the explanation of why this is an age of nerves.

Strange though it may seem, it is in suburban life and not in great cities that the nerves of individuals become unstrung to the greatest extent. It is there that the individual has the greatest regard for himself. When living among masses of his fellows he seems to get a better perspective of life and to realize that he does not matter so much. This is an aspect that a medical correspondent has been discussing in The London Morning Post and he offers some explanation of the "growing pains" of nerves, apart from the rush of modern life. In commenting on this The Post says:

"Suburban life, it is stated, predisposes to neuritic troubles. We shall be presently as full of neuritis as there are quills upon the fretful porcupine resigning the national sang froid to legend. Social jealousies, it is claimed, provoke nerves in the suburbs. There may be something in that. In the midst of a great town a family lives unregarded and may relax the struggle to keep up appearances, because appearances have to be weird and phenomenal before exciting comment. And in the midst of a little village, no one is so foolish as to keep up appearances, since the whole community knows comprehensively and to a T the situation of every single member. But the suburban world is forever looking over the garden fence. It is a pity that nerves are included in our makeup, and still more a pity that when giving trouble they cannot, like that other useless affair, the appendix, be tidily removed."

Ole: "Aye bane want a license?"

Clerk: "What kind, a hunting license?"

Ole: "No. Aye tank Aye bane hunting long enough. Aye wants a marriage license."

DRAW FOR PASS CUP-TIE SERIES ANNOUNCED

With the regular schedule of the Crows' Nest Pass football league drawing to a close, draws are announced for the Grand Central, Crahan and Muta cup-tie series which will feature all teams in the league, except Kimberley.

Draws for the three cup-ties are as follows:

Grand Central Cup

First round, Michel vs. Coal Creek. Blairmore, Fernie and Coleman draw byes.

Second round, Coleman vs. winner of Michel-Coal Creek game; Fernie vs. Blairmore.

Crahan Cup

First round, Coal Creek vs. Michel. Coleman, Fernie and Blairmore draw byes.

Second round, winner Coal Creek vs. Michel game vs. Coleman; Blairmore vs. Fernie.

Muta Cup

First round, Fernie vs. Coleman. Michel, Blairmore and Coal Creek receive byes.

Second round, Blairmore vs. Coal Creek; Michel vs. winners Fernie-Coleman game.

All games will be played on the grounds of the first named team.

Members of an Alberta Rod and Gun Club had a rather interesting experience recently, when fishing in a foothills stream. Armed as is the fashion with all kinds of eatables, plus the absolutely necessary liquid refreshments, a warden was invited to their camp hospitality. After feasting on the good things to eat and the good things to drink, the warden had no more principle than to decide to go through the several fishing baskets in the hope of uncovering a breach of the fishery regulations. Nothing of the sort was found, however. And, as a matter of fact, members of this same party were each one pledged to see that the fishery regulations were carried out, and also to promote the protection and propagation of the inhabitants of our inland waters, and there was no necessity for any government official becoming too officious.

NEW METHOD OF HEALING IS MYSTERY

London.—Colored lights are effecting remarkable cures at a London clinic, it is revealed.

Chromo-therapy, this new method of healing, is a mystery, for no one knows why the differently colored lights have curative effects. Yet it is said to have cured cases of duodenal ulcer, low and high blood pressure, deafness, gastritis and burns.

Out of 2,000 treated during the past year, only two failed to respond to the curative effects of the lights, according to Dr. Noel Scott, writing in The British Journal of Physical Medicine.

Two kinds of lamps are used. One is an ordinary 1,000-watt electric light bulb, such as is used for flood lighting. Colored glass screens are placed to pass only the rays required. The other is an ultra-violet water-cooled lamp.

Rays from the 1,000-watt lamp through a red filter, cure inflammation, congestion, rheumatism, pleurisy

and burns, it is claimed. Yellow light treats organic nerve trouble, such as sciatica and neuritis and raises blood pressure. Blue light lowers blood pressure and cures headaches and neuralgia. Green is for functional nerve cases, neurasthenia, and certain cases of deafness.

A platoon of trekkers on arriving at Kenora, was fed by the Ministerial Association at Knox United church. The despatch which gave this information added that there were complaints among the men about the quality of the food. This throws some light on the mental attitude these men are acquiring from their leaders. They are bound not to be satisfied with anything that is done for them. There is no gratitude for favors, there is no limit to their demands. They are more interested in grievances than in remedies. They are more likely to sting the hand that feeds them than the hand that does not. They cheer the men who claim in their behalf. They jeer those who try to do something in their behalf.—High River Times.

MORE THAN 500 ASSORTED ARTICLES FOUND IN MAN'S STOMACH

London.—More than 500 objects, including forks, knives and nails, were found in a man's stomach by Dr. R. Stewart Kendall, of the County Mental Hospital at Chester.

"My stomach is too smooth," the patient complained, "I swallowed these things in order to roughen it." Growing suspicious as the household cutlery continued to disappear, the man's family brought him to the hospital. An X-ray examination showed that his stomach contained a mass impervious to the rays.

An operation for removing the mass was performed. It was found to consist of a multitude of objects, including spoons, forks and knives, screws, nails, granophone needles, keys, coins, cartridges and fragments of glass and china. The total weight of the objects was three and a half pounds. Their removal made the operation extremely difficult, and the patient did not recover.

It pays 3 ways to choose a MASTER CHEVROLET

You Get
KNEE-ACTION
plus Blue Flame Engine
and Shock-proof Steering

You Get
TURRET-TOP
BODIES BY FISHER
and No-Draft Ventilation

You Get

WORLD HAPPENINGS BRIEFLY TOLD

The Duke of Gloucester, the King's third son, has been made a full major in the 10th Royal Hussars.

Before sailing for home the Canadian Bliley team enjoyed a round of hospitality at Glasgow, Scotland.

The British House of Commons adjourned Aug. 2, to re-assemble Oct. 28, it was announced by the speaker, indicating no plans for a general election before next spring.

The electric chair installed in Sing Sing Prison 44 years ago has taken the lives of 375 persons, only four of whom were women, it was revealed by prison authorities.

Eventual combination of all British territories from the Cape to East Africa in a "United States of Africa" is suggested by G. M. Huggins, prime minister of Southern Rhodesia.

Many stores and factories, which have been closed since the recent fatal riots in Barcelona, resulted in the death of many Catholics and Protestants, have been reopened.

Harold Sutherland, 17, of Westville, N.S., first player to play for television, was an honored guest at a service luncheon in Charlottetown. Three years ago Sutherland was Canada's champion boy player.

Improvement in barley crops and marketing were discussed when a field day was held at the University of Manitoba farm near Winnipeg under auspices of the National Barley Committee.

Double details of military police paced outside the United States army reservation while officers, amid utmost secrecy, studied a new "mystery ray" said to be capable of detecting the presence of a ship at sea through fog and darkness.

Record Of Publisher

Lord Atholstan Has Served Montreal Star For 66 Years

Lord Atholstan, publisher of the Montreal Star, the Montreal Standard, and influential in other Montreal publications, has attained to the venerable age of eighty-seven years, and is still in active service, giving all his thought to the welfare of his country, his city and his daily service as a commentator on public affairs. Seldom does he miss a day at his office, and never the day but his director of his newspapers is quite apparent.

Of his eighty-seven years some sixty-six have been given to the Montreal Star, and that is a record which has never yet been attained by any other editor or publisher in Canada—sixty-six years of continuous service and of rulership of the leading and most influential paper in Quebec, possibly in all Canada, for the Weekly Star is a wonder in its way, going each week to a quarter million subscribers.

Lord Atholstan was born as Hugh Graham, in the little village of Atholstan, Huntingdon County, on July 5, 1848, but journeyed to Montreal, as did many other ambitious lads from the peninsula of Quebec Province. He started the Star whilst the other papers in the metropolis were in either a somnolent or a poor stage—Sherbrooke Record.

Need Lots Of Sympathy

Editors Of Newspapers Do Not Have Easy Job

Governor Eugene Talmadge, himself an editor in Atlanta, Georgia, said a tear for newspaper workers. "Newspaper work is all work and no play, and very little pay," commented the governor. "I used to think anybody in newspaper work had a nice, interesting job."

"When you keep a paper going, and try to keep your news columns interesting, let me tell you, brother, you've got a job on your hands. I'm keeping my paper out of debt, but it's hard work."

The governor is associate editor of The Statesman, a weekly political paper.

Auctioneer's Voice Sounded

A record of the auctioneer's voice was made during the sale of the Montreuil's furnishings, and will be stored away for the benefit of posterity in the Gallery of Famous Voices and Famous Occasions in Broadcasting House in London. The auctioneer's voice will keep company with those of Britain's greatest men and women, from the King and Queen down.

Doctor: "But, my dear man, I can't prescribe whiskey for you unless I am sure you need it. What are your symptoms?"

Fellow: "What symptoms should I have, doctor?"

The Joys Of Motoring

Toronto Man Had Plenty Of Grief For One Day

Even Chief Draper never had any more trouble with parking and parking than a well known man had the other day. . . . He spotted a space between a small sedan and a large coil truck, but despite clever manipulating, the space was a bit too small.

Climbing out, he stepped back to the sedan, only to find it locked, and unbudgeable. . . . then he approached the truck, hoisted himself up to the driver's seat, released what he thought was the emergency brake . . . and dumped five tons of coal on Yonge street.

Of course, you think the tale ends here . . . but our man has had more bad luck, and this, cross our heart, is a true story. He casually tossed a cigarette out the car window and some time afterwards smelted smoke.

Looking about, he discovered that the lighted cigarette had gone into the back seat instead of on the road, and that said back seat was now on fire. . . . Keeping his presence of mind, he stopped the car, lifted the entire back seat out, and threw it over the fence into the fields. . . . And while he was congratulating himself on getting out of that nasty situation nicely, he heard shouts. . . . and turned around to find that he had set fire to a hay field, which, before the volunteers had it quelled had burned two acres of hay.—Toronto Telegram.

The Rubber Industry

Production Has Shown Astonishing Growth In Present Century

Rubber as an industry has had a most phenomenal growth and is one of the highlights of twentieth century civilization. At the beginning of the present century, production amounted to four tons a year; in 1934 it had reached approximately 1,000,000 tons. One of the chief rubber producing centres is British Malaya, which produced 465,768 tons of rubber last year, or about half the total world's supply, according to the Industrial Department of the Canadian National Railways. The improvement which has taken place in world trade is reflected in the value of the rubber exports from British Malaya for the first ten months of 1934, which increased to \$229,640,000 from \$122,500,000 for the same period the year previous, or 87.4 per cent. At the beginning of last year, British Malaya had 3,135,000 acres of land under rubber. A great deal of it also comes from British Malaya. Imports into British Malaya from Canada show an increase of 30 per cent. 1934 over 1933, principally in motor cars, dried fish, canned milk, canned vegetables, wheat flour, timber.

Dalai Lama Chosen

Search Lasted Eighteen Months Before Right Baby Found

It has taken eighteen months for the Grand Lamas to find the right successor to the late Dalai Lama, in whose office the palace treasury combines that of Emperor and Pope. The chosen successor must be a Tibetan baby, born at the same moment that the Dalai Lama died, and into whose body the august ruler's soul has passed. A commission of seven priests was sent for this baby, and on this occasion found twenty, from whom six were chosen by the Grand Lamas for final selection before the praying-wheel and image of Buddha in the Lhasa palace. After being anointed with sacred butter, and bathed in water from the Ganges, the new infant Dalai Lama, guarded by soldiers, is parted from his mother forever. He is educated for his high station, but is also accompanied with material wealth. She is taken before her departure to the palace treasury chamber, and may carry away as much gold and gems as she can gather in both arms. Tibet is a plateau, three times as big as France, almost as cold as Siberia, and most of it higher than Mont Blanc.

Known the world over as merely Queen Mary her Britannic Majesty's full array of names runs off like this: Victoria, Mary Augusta, Louise Olga Pauline Claudine Agnes Windsor.

Travelling more than 3,000 feet each second, bullets from powerful rifles are the fastest things on earth next to light and electricity, experiments at Montreal show.

Woman learning to drive: "But I don't know what to do."

Her husband: "Just imagine that I'm driving."

"Italy is rewriting an heroic page of her history."—Musolini.
—Thomas in the Detroit News.

Recipes For This Week

(By Betty Barclay)

EMERGENCY SPECIAL

1 1/2 lbs. round steak
1/2 cup fine dry bread crumbs
1 egg well beaten
1 teaspoon onion juice
1/2 teaspoon salt
Pepper
Milk to moisten

Put round steak or some other cut of beef through the meat chopper four or five times. Add other ingredients and mix very thoroughly. Add milk to make the right consistency to mold into small cakes about 1/2 inch thick. Fry in hot fat until well browned. (Bacon or ham gives a good flavor.) Remove the meat cakes and make a gravy by adding flour to the fat remaining in the pan and stir until the flour is well browned. Use enough flour to make a cream sauce of medium consistency (1 cup milk, 2 tablespoons flour). Add milk until desired consistency. Return browned meat cakes to cream sauce and finish cooking cakes over a low fire. This serves about eight persons.

DRIED APRICOT AND PINE-APPLE JAM

4 cups (2 lbs.) prepared fruit
7 cups (3 lbs.) sugar
1 bottle fruit pectin

To prepare fruit, add 2 cups water to 1/2 pound apricots. Cover and let stand 4 hours, or overnight. Drain fruit, grind or chop fine, and mix with juice. Crush well. Grind 1/2 medium, fully ripe pineapple or use 1 No. 2 can crushed pineapple. Measure sugar and prepared fruit into large kettle, filling up the last cup with water if necessary. Mix well and bring to a full rolling boil over hottest fire. Stir constantly before and while boiling. Boil hard 1 minute. Then remove kettle from fire and stir in bottled fruit pectin. Stir; pour quickly. Paraffin hot jam at once. Makes about 11 glasses (8 fluid ounces each).

Fortune Plays Strange Tricks

Fortune has played queer tricks on some of the prize winners in the Jubilee "dip" of Calcutta, India. A complete heirloom man has drawn a ticket entitling him to a free permanent wave, and a poverty-stricken coolie has won a cocktail shaker. An Indian cook's prize was a permit to dine with a friend, free of charge, at one of Calcutta's most palatial hotels.

Ends Long Canoe Voyage

Montreal Girl Makes Trip To New York Alone

"Fed up" with humanity, Ida Lyman, 22-year-old Montreal social worker, recently completed a 500-mile water trip from Montreal to New York in a 16-foot Eskimo kayak.

"This trip has been a good rest for me," she said, after she finished telling of the rigors of the voyage. Storms and rapids beset the route—via Lake Champlain—which was taken by the pioneers of 200 years ago.

She is the first person to make the trip single-handed, said Capt. Bill Byrne, president of the George Washington Boating Association, New York, at whose boat she tied up.

Miss Lyman, a native of Denmark and a naturalized Canadian, said the first leg of the trip was the hardest. Storms and rapids beset the route—via Lake Champlain—which was taken by the pioneers of 200 years ago.

Miss Lyman returned to Montreal by airplane.

Knew Famous Nurse

Ontario Nurse Was Once Engaged To Florence Nightingale

Among the interesting books and papers which have been presented to the University of Western Ontario, London, by Thomas Connor of Godrich is a collection dealing with Rev. John Smithurst, who died at Elora, Ontario, in 1867, and who in his youth was engaged to Florence Nightingale, the famous nurse. Rev. John Smithurst was born in Derbyshire, England, and was a cousin of Florence Nightingale. In his youth they were engaged to be married, but as he was an older man the families objected and the engagement was broken. Mr. Smithurst came to Canada as a missionary and his fiancée went on to reach great heights of fame as a nurse.

No Doubt About It

"Thou' you're hands, big boy—and tho' 'em up fast!" ordered the gentleman with the gun.

"Ah, calm," replied the victim.

"Ah, got rheumatic?"

"Yes, you kin," said the footpad.

"Ah, got automatics?"

"You win, Mistah, you win!" said the victim, as his hands went up.

"If dose looks lak your 'atrics is do stronger?"

SUNDAY SCHOOL LESSON AUGUST 11

DANIEL (Temperance and Health)

Golden text: Know ye not that your body is a temple of the Holy Spirit which is in you, which ye have from God? 1 Cor. vi. 19.

Lesson: Daniel, Chapter 1.

Devotional reading: Psalm 46.

Explanations And Comments

King Nebuchadnezzar's Plan for Daniel and His Companions, Daniel 1. It was in the third year of Jehoiakim's reign (606 B.C.) that Nebuchadnezzar, King of Babylon, first besieged Jerusalem and carried back to Babylon Jewish captives, together with some of the treasures of the temple. Among the captives were Daniel and the other youths of our lesson. The king had directed one of his officers to take Jewish youths of noble families who were especially fair and bright, and have them enter what has been called "The Prince's College of Babylon." For three years they were to receive education for the civil service.

They were to be taught the language and learning of the Chaldeans. They were to be given the thought of the food and wine served to the king himself.

Daniel firmly resolved that he would not live upon the king's dainties and wine, for he knew they were not good for him. Moreover, the thought of them as defiling, for the "dainties" might have been offered in sacrifice to idols, or might not have been prepared according to Jewish laws, or might be the flesh of animals held to be unclean by the Jews. See the law in Dt. 12: 23, 24; Lev. 11: 4-24.

Daniel requested Ashpenaz, the officer in whose charge he was, to permit him and his three companions to refuse the food given. Though kindly disposed toward Daniel, the officer hesitated to grant his request. "Why, should the king compare your face with those of the other youths and notice that you are in poorer condition than they?" he questioned. "The king might think that I had enriched myself with what had been provided for you, and my life would be forfeited," he added.

Daniel had a plan which he knew would not get the officer into trouble and he proposed it. "Test us," he said, "let us eat pulse (herbs, Revised Version), vegetables, Mofatt's) and drink water for ten days, and then compare our faces with those of the king's dainties, and deal with us accordingly."

The Success of the Experiment, Daniel 1: 14-16. Ashpenaz yielded to Daniel's request, doubtless with many misgivings. At the end of the time specified, the experiment had succeeded—the four youths were found heavier and fairer than those of the king's food, and they possessed of cardiac disease in the breast. A lime-sulphur orchard spray living and High Thinking, Daniel 1: 17-20. God gave the four youths, Daniel, Hananias, Michael, and Azarias, knowledge and skill in all the learning of the Chaldeans. They were industrious students, but the gift came none the less from God, as do all our gifts.

And Daniel had understanding in all visions and dreams: see Chapter 2. When all the magicians and enchanters in his realm, and they were given positions which involved personal attendance upon him.

Town Crier Not Needed

Newspaper And Radio Have Killed Profession In England

The job of town crier of Cromer, England, does not pay and R. H. Laurence has resigned the post. The crier's average during the summer season were only \$3 a week. In the winter he earned practically nothing at all.

Hence the office of town crier has become vacant and the gorgeous uniform has been folded away among the mothballs. The 200-year-old bell is also silent.

In the summer there were entertainments and theatrical performances to advertise in the ancient manner of "crying" in the streets. Occasionally a visitor employed the crier to announce the loss of some article. For a modest fee Laurence donned his uniform, packed his bell under his arm and worked his way right through the town, stopping at every important corner to cry his news.

Town crying as a profession in England is falling away. Newspaper and the radio have crimped their style.

One Paper Mill In Egypt

Paper was made in Egypt centuries ago, but to-day there is only one paper mill, located at Alexandria, and it produces cardboard for making cigarette boxes for which there is a great demand. Waste paper and rags obtained locally are used in the manufacture of this cardboard.

It was the custom of Romans to shave off the beard at the age of 21, and present it as an offering to household gods. A beard was grown after that age only as a sign of mourning.

Little Journeys In Science

ALKALIS

(By Gordon H. Quast, M.A.)

The term alkali is of Arabic origin, and is used to designate certain substances like lye, washing soda, and ammonia. Alkalies are capable of neutralizing acids. Alkaline substances possess properties in many ways opposite to those of acids. A carefully balanced mixture of an alkali with an acid, generally neutral, being neither acid nor alkaline. A person who has swallowed an acid poison is given a dose of an alkaline substance such as washing soda, which is known in science as sodium carbonate, or even plaster scraped from a wall.

Alkalies when dissolved in water have the property of turning red litmus, a dye extracted from certain lichens, blue. A substance which changes its color upon the addition of an acid is known by scientists as an indicator.

The most common alkalies are sodium hydroxide or caustic soda, potassium hydroxide or caustic potash, calcium hydroxide or slaked lime, and ammonium hydroxide or ammonia water. The scientific term base is also used to designate an alkali.

Sodium hydroxide is a white solid compound, which may be prepared in the form of lye sticks. It is very soluble in water and the solution is usually called lye. This solution has a caustic taste and a slippery feeling. Sodium hydroxide is used on a large scale in the manufacture of hard soap. This is done by heating certain fats or oils, such as palm-oil and coconut, with the alkali. A solution of this base is also used to remove skins from fruits, such as the peach, which is done by dipping the fruit into a boiling solution for a short time. When a piece of pure sodium hydroxide is used in testing paper, solution of lye, the material dissolves completely. Cotton, however, is insoluble and hence sodium hydroxide is used in testing paper for cotton or other vegetable fibres.

Potassium hydroxide, known commonly as caustic potash, is very similar to sodium hydroxide, but is more expensive.

Sodium hydroxide or slaked lime is used on a large scale in mortar. It is also used for whitewash and in expelling lime-water. In the laboratory lime-water is used to test for carbon dioxide gas. When carbon dioxide comes in contact with calcium hydroxide, a chemical reaction takes place producing a white insoluble substance known as calcium carbonate. It is used in testing paper for lime-water to a milky color.

The breath contains carbon dioxide and lime-water is used in testing paper for a straw into a solution of lime-water, the lime-water turns milky. This is a simple experiment. The presence of carbon dioxide in the breath. A lime-sulphur orchard spray living and High Thinking, Daniel 1: 17-20. God gave the four youths, Daniel, Hananias, Michael, and Azarias, knowledge and skill in all the learning of the Chaldeans. They were industrious students, but the gift came none the less from God, as do all our gifts.

And Daniel had understanding in all visions and dreams: see Chapter 2. When all the magicians and enchanters in his realm, and they were given positions which involved personal attendance upon him.

Blind Are Good Swimmers

Show Amazing Coolness When Diving From Springboard

Blind girls use their toes instead of their eyes, as was demonstrated to Viscountess Hampton at the opening of the new swimming pool at Chorleywood College, Hertford, England, where blind girls are being educated. The pool has a raised pavement round the edge and the springboard is fitted with a doubled thickness of matting at its end. Using their toes as guides instead of their eyes, the girls plunge in with easy grace.

An official of the National Institute of the Blind says: "Swimming is one of the exercises that the blind enjoy with the confidence of sighted people and the coolness with which some of the blind girls at Chorleywood leap off a six-foot diving board is amazing."

The college is for those who are totally blind or whose sight is so poor that they dare not read more than one or two books in a year.

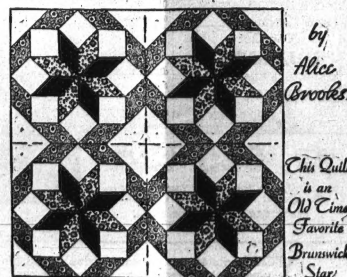

China Lends Treasures

Chinese art treasures worth millions of dollars rest upon heavy armed police guard in the basement of Burlington House, headquarters of the Royal Academy, London, after being landed from the cruiser Suffolk. The treasures will remain under guard until the Fall, when they are to appear in a special exhibition. They were looted by the Chinese Government.

Famous Horse Put To Death

Prince, the imposing cream-colored drum-horse of the Royal Artillery mounted band, is dead. He was taken ill while rehearsing for the Jubilee and when an examination at the Aldershot veterinary hospital revealed his hopeless condition he was put to death. Prince was 18 years old, and was well known to the King and Queen.

Household Arts

"Twinkle, twinkle little stars," and they're really not so very far, for this is the kind you can capture and anchor securely to earth by means of a beautiful patchwork quilt. The "Brumswick Star" with its eight clearly defined points, bordered by eight contrasting diamond patches, has all the delicacy of a snow crystal, yet is surprisingly easy to place, and make decorative repeat on an all-over quilt. Only four materials are needed for it, and, to simplify matters, there are only three pattern pieces. This quilt is an old colonial favorite.

In pattern 8249 you will find the Block Chart, an illustration for cutting, sewing and finishing, together with yardage chart, diagram of quilt to help arrange the blocks for single and double bed size, and a diagram of block which serves as a guide for placing the patches and suggests contrasting materials.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg News Union, 375 McDermott Ave., E., Winnipeg.

There is no Alice Brooks pattern book published.

FLY PADS

REALLY KILL

One pad kills flies all day and every day for 2 or 3 weeks. 3 pads in one packet. No spraying, no stickiness, no bad odor. Ask your Druggist, Grocery or General Store.

SYNOPSIS

Nancy Nelson is a sub-deb, a gay, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market crash, her indulgent father loses all he had, and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric uncle in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at the estate. They are met at the railway station by Columbine Nelson, who in turn introduces them to her cousin, Adam, two neighbors of Aunt Columbine, and the party set out for Pine Ridge, which village she disdains to meet both Nancy and Jack because of its dilapidated appearance and general look of poverty. Nancy and Jack are shown to the rooms they are to occupy, and both the young people consider the furniture and decorations hateful and contrasting the present quarters with their luxurious home in Boston, wonder if they can endure the change for any length of time. Aunt Columbine tells why she wrote the letter to them, and relates some of her early experiences at Pine Ridge of hostile Indians and forest fires, of her father's hunt for gold, and of her mother's splendid spirit, but frail body, which could not endure the rigors of pioneer life.

Nancy set out one afternoon to climb to the top of a hill so as to obtain a view of the surrounding landscape and misses the path Aurora Tubbs had told her to follow. A truck comes along the road, driven by Matt Adams, and she asks him how to go to go. They ascend the hill, look around, then they go on to Cousin Columbine's. There Mark Adams tells Nancy that his brother Luke has broken his leg, and that Jack Nelson has been tried to help out while Luke's leg gets better.

No One On The Story

CHAPTER XI.

It was after Mark Adams had continued on his way, fortified by a substantial dinner and armed with a pumpkin pie and Aurora's "compliments" for Jack, that he carried a glass of warm milk into Cousin Columbine's bedroom, and asked if there were anything she could do for the invalid.

"You can sit down and let me look at you," responded the old lady. "I've got the upper hand of this cold already, and am staying here only because I believe in safety first. Every hour wasted by sickness makes me impatient. There's so much to do in this wonderful old world; and when you're over seventy there's such a little time to do it in. Aurora tells me Jack's getting on all right—not that I expected anything else. He's got the Nelson grit, and there's no chance that he'll be imposed on at the Adam ranch. Eve would see to that even if John Adam wasn't the kindest, soul alive. Some thought they were too easy going when the boys were youngsters, but—look at the four of 'em!"

"Well, you'll see them all in good time, unless you get desperate and

run away from me. I love Pine Ridge even in a blizzard; but I can see how it looks like the end of nowhere to a girl brought up as you're been. I was glad Mark Adam happened in at dinner time to keep you company. Has Aurora Tubbs been talking you to death?"

Nancy laughed.

"Not quite. I let her rattle on and killed time listening."

"Killed time!" echoed Cousin Columbine. "Don't ever use that phrase again, child. Life's too short to be lost, and even a day like this there are things to do. Everything's made too easy for people now-a-days. That's the only trouble with 'em. I was younger than you, my dear, when Father took me to Leadville. More than fifty years ago, yet I can shut my eyes and it seems like yesterday."

"Was it much of a place at that time?" questioned Nancy as Cousin Columbine sipped her milk.

"Much of a place I wish I could make you see it. As the estate at that time had come down to make room for the town, Nancy, and new-backed stumps of spruces were still standing in the streets—if they could be called streets. The houses were nothing but shanties or hastily made log cabins. Our own was of logs with a stove pipe for a chimney. The family next to us used old flower pots for the purpose. Some of the shacks had only canvas for roofs; and others—if you'll believe me—no roofs at all. From an eccentric uncle in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at the estate. They are met at the railway station by Columbine Nelson, who in turn introduces them to her cousin, Adam, two neighbors of Aunt Columbine, and the party set out for Pine Ridge, which village she disdains to meet both Nancy and Jack because of its dilapidated appearance and general look of poverty. Nancy and Jack are shown to the rooms they are to occupy, and both the young people consider the furniture and decorations hateful and contrasting the present quarters with their luxurious home in Boston, wonder if they can endure the change for any length of time. NATURE'S MINERAL SALTS

SASKASAL

"Aurora says he's his mother's favorite."

"Stuffed and nonsense! If she felt any favoritism Eve Adam—has too much sense to show it; but Luke's affectionate, and not ashamed to let folks find it out. I've thought at times that Eve had a leaning toward Matthew, but if that's true it's only because he's so shy she wants to protect him."

"How old is John?"

"Sixteen. Living with friends at the Springs and going to high school. He's headed for college in the fall. He and Mark are as alike as two peas in looks; but John's more quiet and studious like his father. Mark's the liveliest member of the family, but Eve has a right to be proud of him even if he has only a high school diploma. In place of Matt's A.B. He still hopes to study forestry when his father can spare him. Put a stick of wood in that stove, Nancy, and then I'll try to get a nap."

"An Adams obeyed she glanced at the bedside table on which lay a copy of the Atlantic Monthly almost a year old. This reminded her of Pine Ridge's lack of reading matter, and she asked: 'How does it happen that there's no library here, Cousin Columbine?' It's a pretty small place, but doesn't anybody like to read?"

It was moment before the old lady responded; then she said: "I suppose most of the folks 'round here are well, they haven't a great deal of education, and no background whatever. The Adams, and Theodore Taylor, our postmaster, are the exceptions. The truth is, Nancy, any youngsters with ambition usually leave town, which is not to the advantage of Pine Ridge as a community. Then too, every one has work to do, and reading's regarded as a luxury. That's a wrong, of course; but being a pioneer I can understand it."

"But they have time to loaf around the store," observed Nancy shrewdly. "And if they could get good books just by going to a library, perhaps they'd stop buying those awful magazines Juvenile feeds on."

"Maybe they would," admitted Cousin Columbine, "but public libraries don't grow on bushes; and in a place like this there's no Aladdin to rub his wonderful lamp and wish for one."

Nancy laughed as she went out, leaving Cousin Columbine to her nap. Aladdin! What would she do to Pine Ridge if she possessed his lamp? This idea, and the inspiration which was born of it as hours later, so absorbed the girl that any necessity for "killing time" was quite forgotten.

"What you been doin' this long afternoon?" questioned Aurora, poking her head into the tower room without ceremony. "Supper's been ready for ten minutes; but everything's so still '—and here I thought maybe you was sound asleep."

Nancy glanced up from the lengthy and momentous letter she was writing to her Aunt Louise.

"You're right, Aurora. I think I've been asleep most of my life, but I'm waking up, thank goodness! Did you ever hear about Aladdin and his wonderful lamp?"

CHAPTER XII.

Nancy's letter to her Aunt Louise arrived on a Saturday, and she carried it out to Edgemore to read aloud. The young people had been gone more than a month, and as the strangeness of their absence wore away, life was settling down to its new routine, and Phil declared he never wanted to go back to the city. There were times when his mother agreed with him. Despite financial worry, Margaret Nelson was conscious of a sense of restfulness which had been lost to her during the last few years. Fond as she was of her husband's sister, Louise's almost daily comments on the children often annoyed her; but now the week-end visit was something to look forward to. To-day she arrived on the train with her brother, and said before he had taken off her hat:

"I've a letter from Nancy. It's rather surprising on the whole. Shall I read it now?"

"Let's wait till I get supper on the table," suggested Margaret, with a glance at her husband's tired face.

"Phil says he's famished, and no wonder! He's dug out every path since four o'clock. I don't know what I'd do without that boy, here in the country. He's a real worker."

"And in town there were no chores

to occupy him," observed his aunt. "This move has been a splendid thing for Phil, Margaret. He looks and acts like a different boy. And I'm not sure but that the visit to Colorado has done something for Nancy, even if I did oppose it. Just wait till I drop my things and I'll help with supper. Those beans smell the way Boston baked beans ought to smell! I'll be down in a moment."

Watching his sister run lightly up the stairs, James Nelson wondered if the change in environment hadn't benefited her as well as Phil. Possibly Louise appreciated this taste of family life the better, because of her absence during the week. As she disappeared, he bent to kiss his wife for the second time since his arrival. It was Margaret comprehended, an effort on his part to make up for the lack of cheering news, and tactfully refrained from asking how the day had gone.

"This is wonderful brown bread," declared Louise when they assembled at supper. "In our days of affluence, Margaret, I'd completely forgotten that you could cook! I'll take two bites and then read the letter. Have you heard from Colorado yourself to-day?"

"A note from Jack. He says—"

"It was addressed to me," broke in Phil impatiently. "He'd learned to milk; and is riding horseback every day. He says those Adam people are awfully nice, and that Mr. Adam does a lot of cooking because his wife doesn't like to and he does. He hadn't seen Nancy for more's a week, but one of the Adam boys was there to dinner—at Cousin Columbine's, I mean; and there's been a blizzard; and Cousin Columbine and Nancy are going to get Christmas dinner at the ranch 'cause they can't spare Jack; and Mr. Adam's going to cook the turkey all himself. I wish I could go to Colorado and get a job. Just feel my muscle."

Aunt Louise complied obligingly; and having satisfied her first hunger, opened the letter from Pine Ridge.

"Read it all," said Dad. "We haven't heard for several days."

"No doubt Nancy counted on my bringing this out to-night. It should have reached me sooner. Those storms in the middle west delayed it, and she's in a hurry for an answer too. She says:

(To Be Continued)

New Material For Bombs

Sugar Treated With Liquid Air Makes High Explosive

Sponge cakes and lumps of sugar may serve as bombs in the next war, a gathering of scientists in London was told.

Professor W. B. Tuck of London University demonstrated the deadliness of these sweets before the scientists. He soaked a piece of sponge cake in liquid air which flared up violently when touched with a match.

Treated with liquid air a piece of cake or a lump of sugar could be used as high explosives," said Professor Tuck.

Prince Visits Guernsey

France-Prussian friendship was invoked by the Prince of Wales when he was welcomed at St. Peter Port, Guernsey, on his arrival aboard the destroyer Faulknor by Lieut.-Gov. E. N. Broadbent. The prince declared himself happy to visit "this beautiful and fertile island because of its long connection with the British Crown and its role as a connecting link with the great friendly nation on the other side of the English Channel."

For the funeral pyre of a Buddhist priest in Burma recently, an enormous white elephant was made of paper and bamboo, and the coffin raised to the canopied seat on the elephant's back for burning.

Don't make fun of a fool unless you are in the same boat.

Lost Many Times

Great Seal Of England Has Caused Some Uneasy Moments

The custody of the Great Seal, which passed from Lord Bunsby to Lord Hallahan, the new lord high chancellor, in the recent changes in the British government, has given some uneasy moments to sundry lord chancellors of the past.

More than once the symbol of authority has been stolen, and on one occasion it was not recovered. James II, when flying from Whitehall, threw the Great Seal into the Thames, whence a fisherman recovered it by chance some weeks later. Once when Lord Brough was in Scotland the Great Seal was abstracted from his room by playful young ladies who, on beholding his extreme distress, set him to find it, by a game of "hot and cold," in the family tea-caddy.

In 1812, when Lord Eldon's house took fire, Eldon himself rushed out with the Great Seal and buried it in safety in a flower bed. In the excitement he forgot the hiding-place, and after the fire was extinguished the whole family had to set to and dig with sticks in the various beds until it was located.

Explorer Claims Discovery

Polish Count Believes He Has Found King Solomon's Mines

A claim to have identified Ophir, the mysterious country from which King Solomon procured gold for the temple of Jerusalem, is made by Count Byron de Prorok; the Polish explorer.

He says the Ophir of the Bible was the modern Werka Persia, in the unknown mountains of Western Abyssinia, which means "the valley of gold."

Count de Prorok found that mines which furnished gold for the tombs of the Kings of Egypt thousands of years before Christ are being worked to-day for local native rulers.

It was only with the greatest difficulty, and after the personal intervention of Lord Tyrrell, ex-British Ambassador in Paris, that he obtained permission from the Emperor of Abyssinia to visit Werka Werka, he declared.

Even then he and his party had to travel at night and by secret passes to avoid capture. Near the spot he came on hundreds of slaves seating gold. Nearby were stone pyramids, said to be tombs of slaves of the time of the Egyptian kings.

"Now tell the jury, lady," instructed the young lawyer, "just where the prisoner was milking the cow."

The young lady, a trifle embarrassed, smiled sweetly and replied, "Why, I think it was just a little back of the centre, sir."

Sweden has advanced to fifth among shipbuilding nations, passing Germany in this respect.

Little Helps For This Week

Who hath despised the day of small things? Zechariah 4:10.

Little things on little wings Bear little souls to heaven.

An occasional effort even of an ordinary holiness may accomplish great acts of sacrifice, or bear severe pressure of unwonted trial. But constant discipline in unnoticed ways, and the spirit's silent unobtrusiveness becoming the hidden habit of life, give to it its sanity beauty, and this is the result of care and lowly love in little things. Perfection is attained more readily by this constancy of religious faithfulness in all the details of life, consecrating the daily efforts of self-forgetting love.

Love's secret is to be always doing things for God, and not to mind because they are such very little ones.

Some Old Bank Notes

Found in Ancient Records And Dated 1770 And 1776

Two samples of paper currency, issued by British Colonies in America before they became American States, have just come to light at Cincinnati, Ohio. They are a Maryland note for six dollars, entitling the holder to receive "Bills of exchange payable in London with gold or silver, at the rate of four shillings and sixpence for each dollar," dated 1770, and a New Jersey bill, issued in 1776, for twelve shillings. Both bear the warning: "To counterfeit is death." The bills were found in a bundle of old records in the Cincinnati Board of Education Library. How they got there is a mystery, since at the time they were issued Cincinnati was not even a trading station, and few white men had penetrated into that part of the Red Indians' territory.

Use Skyscraper Mast

Tower Being Built In Moscow To Train Parachute Jumpers

Partly for military training, partly for sport, the Soviet Union is building in Moscow a steel tower some 350 feet high, from which parachute jumpers may be trained.

The tower, in pentagonal shape, will have five platforms from which parachute students may jump. To stimulate the experience of making an actual leap from a plane, the platforms will be made in the form of an aeroplane cabin.

An elevator placed in the centre of the tower will carry jumpers to the platforms. The tower also will serve as a beacon for aeroplanes and a mooring mast for dirigibles. Its lights will be visible for 18 miles.

Government scientists compare the earth's vegetation with a human being's skin—remove much of it and dreadful sores result.

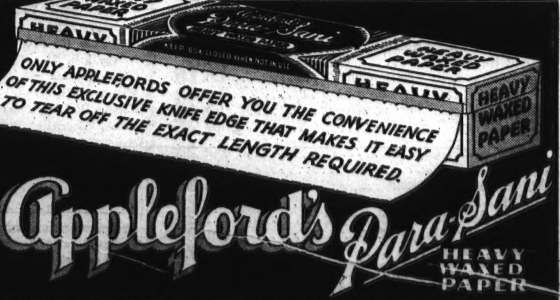

WEAK WOMEN

ARE you tired, nervous, run-down? No pep? No energy? Take Lydia E. Pinkham's Vegetable Compound. It's a little C.C. that gives quivering nerves more energy, makes the appetite—makes life seem worth living again.

Mrs. James Martin of 227½ Main Street E., Hamilton, Ontario, says: "Your Vegetable Compound built me up wonderfully. I feel much stronger."

Warehouses At Calgary, Edmonton, Regina and Winnipeg

Jack Patterson and family returned last week end from their vacation.

Mrs. C. Reddick, of Kimberley, is a visitor here with her mother, Mrs. A. Gibeau.

J. F. Smith, proprietor of the Comopolitan hotel, was a business visitor to Calgary by motor this week.

"Me daughter's getting on fine with her breach of promise case. She's passed all her cross-examinations already."

Twenty years ago, Messrs. Eddy, Ballantyne, Scobie, Smith, McDowall and Mitchell, farmers in the Beaver Mines district, suffered heavily from a hail storm.

A new watch and clock repair shop is being opened up at the west side of the Orpheum theatre front by M. Litviak. Albert Noga, watch and clock repairer, occupies the east front.

Charlie Fauver, an old timer of Blaimore, who for the past seven years has been residing in Coleman, is looking quite hale and hearty on the eve of his eightieth birthday. He can still knock around, and has eyes that can read without glasses.

J. V. McDougall, motoring with his family back towards Blaimore from Raymond on Sunday, suffered a mishap, when a blowout was followed by his car tipping into the ditch. The car was considerably damaged, but the occupants escaped with but a few bruises.

The western Canadian wool clip forwarded to the assembling point at Weston, Ontario, this year is reported to be the cleanest and lightest shrinking of any wool received during the past eight years. Sample bales of various grades have been shipped to London, England, where they will be displayed in the wool auctions now being held.

No objection was registered against Arthur Morris going back to Wales.

In a league football fixture on Saturday evening, Blaimore defeated Michel 1-0.

W. J. Stokes, of Calgary, and Thos. Guy, of Claresholm, are visitors in Blaimore this week.

Eight dollars was found in a barber shop at Innisfail by robbers. The robbers must have been real optimists.

Dr. W. H. Keen recently celebrated the thirtieth anniversary of his coming to Nanton, Alberta, from London, Ontario.

Mrs. N. Oswald, of Cranbrook, has been visiting with her mother, Mrs. Andel, at Frank, and sister, Mrs. J. V. McDougall, in Blaimore.

The body of Rev. Father Allard, drowned in the Cottonwood Rapids of the Laird River, B.C., three weeks ago, was found twelve miles from the scene of the tragedy.

A. K. Dell, an employee of Macdonald's Consolidated, Lethbridge, is the new manager of the company's warehouse at Fernie, recently purchased from the Western Canada Wholesale Co.

Mrs. C. B. Becher left on Tuesday night for Couer d'Alene, Idaho, where she has taken a cottage for three weeks. Mr. and Mrs. J. B. Wilson, of Blaimore, have also taken a cottage at that resort—Macled Gazette.

A meeting in the interest of Donald J. MacNeil, Liberal candidate for Rocky Mountain constituency, will be held in the local Columbus hall tomorrow (Friday) night, to be addressed by Mr. A. Macleod Sinclair, K.C., of Calgary; Mr. MacNeil and others. We have received no notice of Social Credit or Communist meetings.

Local and General Items

The Editor will be pleased to receive items for this section, regarding visitors entertained, parties leaving for holidays or short trips, bridge parties, teas, etc. Phone items in to 11 or hand them in at The Enterprise office no later than Wednesday evenings.

Mr. and Mrs. D. Kemp, Jr., and Mr. and Mrs. F. H. McKay are spending their vacation at the Livingstone.

That word "Mississippi" only requires four letters of the alphabet. Figure it out.

Miss Helen Tompkins, of the staff of St. Michael's hospital, returned to Lethbridge last week, after a month's vacation with her parents here.

Mr. and Mrs. Joe Mison, accompanied by the former's brother, returned from California on Friday night last.

There's an island in the Pacific that is said to be governed by goats. There has been talk of an attempt like that being made in this country.—Ex.

Mr. and Mrs. Emil Blas, senior, after spending part of their annual vacation motoring around the Banff-Windermere trail, decided to spend the balance of the holiday in camp near the Gap on the North Fork.

There were eighty-four food chain companies operating 2,281 stores in Canada in 1934, with sales amounting to \$104,614,500. In 1933 there were more chain companies, but less sales.

COUNTER CHECK BOOKS—order them at The Enterprise office at the same price as you can get them at the factory, or from a traveller. Keep as much money as you can in Blaimore.

Large bills are being posted, announcing Bellevue's eighteenth annual Flower Show and Sports, to be held in Bellevue on Monday, September 2nd (Labor Day). The show, as usual, will be held in the spacious Bellevue arena, the sports on the athletic grounds, and the dance at night in the L.O.O.F. hall. Band-its orchestra will furnish music for the dance.

Rumors are current that the present so-called Tim Buck boulevard in Blaimore is to be scrapped, and that something worth while will be established along the south side of Victoria Street that will not be a menace to traffic. It has also been stated that there is a possibility that our main street (part of the trans-Canada highway) will be hard surfaced. Here's hoping the above dreams come true.

Mrs. Samuel Turner met with a painful accident on Monday afternoon when, in the act of picking clothes on an outdoor line, a gust of wind threw her off balance. She fell across a stone, breaking a leg above the knee. She was removed to the local hospital for treatment. It is singular to note that both Mrs. Turner and her daughter-in-law, Mrs. James Turner, are both in the same institution suffering from a similar disablement.

In the interest of G. E. Cruickshank, Independent candidate for reelection, Rocky Mountain constituency, the following meetings are announced: Cole's Theatre, Bellevue, Tuesday, August 13th; Hillcrest, Wednesday the 14th; Blaimore Columbus hall, Thursday, August 15th. Speakers will include Fred C. Moyer, Independent, Drumheller; Norman Hindley, Calgary; John McIntosh, Independent, Bow Valley, and Mr. Cruickshank. All meetings will be at 8 p.m. We understand a meeting will be held in Coleman on August 16th.

Films Developed, any size, 25c with one print from each negative. Extra Prints, eight for 25c. The SASKATCHEWAN PHOTO SUPPLY 268 Second Ave., South, Saskatoon

How many unemployed in Blaimore are seeking work on the farms?

W. R. Pepper, principal of the Fernie schools, has accepted a similar position at Vernon.

Mrs. A. Hamilton, of Drumheller, is a visitor here with Mr. and Mrs. Marshall Hamilton.

There will be no Labor candidate to contest the Drumheller seat in the provincial election. They will, however, have Independent, Liberal, Social Credit and Communist.

A "Brain Bath" has been invented by scientists in the United States. Wonder if this will have any effect on programmes.

Signs recently painted on rocks along the highway in the Slide in the interest of Murphy and Social Credit are to be removed.

Central United congregation and Sunday school are asked to keep in mind the picnic to be held at Burns Creek on Wednesday afternoon, August 14th. Cars leave the church at 2:30 p.m.

Miss Lily Perkins, after spending a few weeks with friends at Cowley, proceeded to the coast for the balance of her vacation. Miss Edna Fulton, also a former member of the Blaimore teaching staff and now of Calgary, is also holidaying at the coast.

It is regrettable that the hymn "O God Our Help in Ages Past" is used for a purpose which the author never dreamed of and which is grossly travestied. Using it as a political campaign hymn borders on sacrilege, especially in the minds of those who associate it with memories of comfort and solace in times of spiritual distress.—Coleman Journal.

Mr. and Mrs. H. Blas and party returned from the Gap on Monday.

John Horgan, of Maple Leaf, was a business visitor to Blaimore on Friday last.

Communists who are under orders from Moscow will be expelled from membership in the American Federation of Labor.

Mrs. S. McKay and son Alex, are Lethbridge visitors this week. They were accompanied on the trip by Mrs. S. Slimister and children.

A woman has designed a garter for low-legged men, so their trousers will fit properly. The woman seemed to have been more embarrassed than the men.

Death by the axe was decreed by the people's court in Berlin, Germany, for Albert Kayser, one-time Communist member of the Reichstag, for preparation of a plot against the safety of the state.

Pete Wasnock returned to Port Angeles, Wash., by Sunday night's train, after about a week's stay here with Mr. and Mrs. J. Angus Macdonald. Mrs. Wasnock and young son are remaining another few weeks.

Blaimore more than evened up with the Calgary Elks in a double-header baseball game here on Sunday. The first game was Calgary's, 9-6; Blaimore taking the second game 13-0.

CARD OF THANKS

Mr. Gale and family wish to thank all who were so kind to them by expressions of sympathy and assistance extended during their recent sad bereavement.
